Diversified Environments

Thin Client

Used for globally diverse environments to bring benefits in the following areas:

Performance

Portability

Consistency

Security

Thin Client

- ***Performance:***
  - **Faster access outside LAN**
  - **Handles diverse networks**
  - **Firewall access**
  - **Easier software license management**
  - **Reduced infrastructure investments**
  - **Client and server software updates**
  - **Load Balancing**
  - **Authentication and encryption**
  - **Server and drive access restriction**
  - **Session shadowing**
  - **Print mapping**
  - **Local/remote copy**
  - **Application integration into standard web browsers**

Thin Client Solution

- ***Portability:***
  - **No application software or data stored on local desktop**
  - **Access using modem, WAN, internet**
  - **Platform Independent - any OS**
- ***Consistency:***
  - **Identical software version**
  - **Data centralized**
  - **Maximize use of concurrent, software licensing fees**
- ***Security:***
  - **User rights maintained centrally**
  - **Application licenses controlled from a single source**
